About me

I'm a Full Stack Developer with years of experience building web applications using Vue, Nuxt, Laravel, and Node.js. I specialize in developing modern websites and systems, focusing on clean architecture, maintainable code, and user experience. I leverage AI tools to accelerate development and improve productivity while ensuring all implementations are carefully reviewed, validated, and aligned with best development practices.

In my current role as a **Full Stack Developer** at **Fanwave Digital**, I contribute to the development of websites, web applications, and internal systems across the full technology stack.

Beyond building UI components, I focus on solving complex problems, improving system architecture, and ensuring performance at scale. I'm often relied on to help teammates overcome technical challenges by identifying root causes and delivering reliable, well-structured solutions.

I'm currently contributing to some of our flagship products, including **andysbetclub.co.uk** — one of the most popular tipster platforms in the UK — and **apostasepalpites.com.br** — a leading tipster platform in Brazil — as well as several internal products.

Beyond day-to-day development, I play a key role in frontend direction across projects — introducing new technologies, refining architecture, and establishing best practices. I've also identified and resolved performance and infrastructure inefficiencies, contributing to reduced costs on Vercel.

I actively contribute to engineering standards through code reviews and technical interviews, supporting team growth and hiring decisions.

I currently play a key role in frontend leadership, driving architectural decisions and building scalable, maintainable systems.

Employment History

Full Stack Developer — Fanwave Digital — Edinburgh, Scotland (Remote)

June 2023 - Present

- Working across frontend and backend to build scalable, high-performance applications
- Leading frontend development using Nuxt, Vue, and SSR architectures
- Improving performance, SEO, and overall user experience
- Introducing new technologies and best practices across the team
- Identifying and resolving key issues that reduced infrastructure costs (Vercel)
- Participating in technical decision-making, code reviews, and developer interviews
- Contributing to high-traffic platforms in the UK and Brazil

Full Stack Developer — FMCX - Marília, São Paulo (Hybrid)

June 2013 — June 2023

Developing digital platforms and systems for large companies and industries, including custom CMS solutions used across multiple client projects.

Key Responsibilities & Achievements:

Backend

- API development and integrations (Payment Gateways, Google Maps, Salesforce, AWS)
- Database architecture and design
- Object-oriented programming (OOP)

Frontend

- Full frontend development from Figma/Adobe XD designs
- Component-based architecture and reusable systems
- UX-focused development and application design
- CMS dashboard development

DevOps / Infrastructure

- Nginx, Docker, AWS, DigitalOcean
 - Server management and deployment pipelines
 - PM2 process management
-

Founder & Frontend Developer — Icoz — Marília, São Paulo (Remote)

January 2010 — June 2013

Worked as a frontend developer and designer for e-commerce platforms using Magento.

- Built and customized e-commerce interfaces
 - Worked closely with design and business requirements
 - Delivered complete frontend solutions
-

Selected Projects

Andy's Bet Club (2023 – Present)

andysbetclub.co.uk

- Contribute to the development of the platform, including the new version launched in 2025, where I lead and build the frontend architecture from the ground up.
- Play a key role in delivering a scalable, high-performance user experience and design, with a strong focus on SEO and performance.

Stack: Nuxt, Vue, TypeScript, Laravel

PPA (2022 — 2023)

ppa.com.br

- Developed the full-stack project, including both the website and CMS
- Integrated Google APIs (Maps, Directions, Places, Analytics)
- Built scalable frontend with Nuxt/Vue and backend with Node.js

Stack: Node.js, Express, PostgreSQL, Vue, Nuxt, TypeScript, AWS S3, TailwindCSS

Grupo Jacto (2020 — 2021)

compliance.grupojacto.com.br

- Developed the full-stack project, including both the website and CMS.

Stack: Laravel, Vue.js, MySQL

PPA Care (2021 — 2022)

- Developed the full-stack project, including both the website and CMS.

Stack: Laravel, Vue.js, MySQL

Vila Poente (2020-2022)

- Developed the full-stack project, including both the website and CMS.

Stack: Laravel, Vue.js, MySQL
